

### Corporate Overview

Corecon Technologies, Inc., based in Huntington Beach, Calif., is a leading software developer for the architecture, engineering and construction (AEC) and real estate industries. Corecon was founded nearly a decade ago by long-time construction professionals who have applied their industry knowledge to develop cost effective, user-friendly software for growing AEC firms. Serving customers worldwide, Corecon's clients include general contractors, construction managers, subcontractors, homebuilders, remodelers, architects, engineers and real estate developers.

Corecon has an impressive record of revenue growth over its history, and has been repeatedly recognized as a *Constructech Magazine* Hottest Technology Company. Corecon is an independent, privately financed company.

### Products

Corecon provides an integrated suite of software for estimating, project management, job cost control, and collaboration that is ideally suited to meet the needs of project based firms. Corecon's solution provides a centralized single point of data entry, making businesses more efficient while improving their project execution.

#### ***Corecon v7***

The company's newest product is Corecon v7, their fourth web release and largest update in the company's history. Corecon v7 utilizes the latest Web 2.0 technologies and is deployed on their second generation web platform. This solution provides more customization, collaboration, and security enhancements. With this new platform, Corecon v7 can accommodate all international date and currency requirements which will expand its market beyond US and Canada.

#### ***Integration Products***

In addition, Corecon provides a set of integration products that bridge the gap between Corecon v7 and popular productivity software. They include:

1. Corecon Link For Microsoft Office
2. Corecon Link for Intuit QuickBooks
3. Corecon Link for Sage Simply Accounting
4. Corecon Link for SAP Business One

#### ***Corecon Mobile***

Corecon Mobile provides convenient and immediate access to construction project information from smartphones and tablets with smaller screens. Developed for use with Corecon V7, Corecon Mobile is compatible with Apple iPhone and iPad, Google Android, HP Palm, Microsoft Windows Mobile, and RIM Blackberry. Real-time updates to project information appear immediately in Corecon V7 without requiring synchronization, and the application is free to all Corecon V7 subscribers.

### Product Distribution

All Corecon products are available directly from Corecon Technologies or through its Value-Added Reseller (VAR) chain. To locate the VAR closest to you, contact Corecon at 1-866-258-6698 or go to [www.corecon.com](http://www.corecon.com).

### Full Service Technical Support

All Corecon users are eligible to take advantage of Corecon's technical support expertise either via telephone or by accessing Corecon's built-in support features. These features include:

- Pre-recorded training videos showing key Corecon features.
- Live weekly webinars

Customers can reach technical support by calling (866) 258-6698 between 8 AM to 6 PM PST during regular business days. Corecon guarantees customers will receive a response to their calls within two hours during normal business hours. Customers may also contact Corecon via e-mail at [support@corecon.com](mailto:support@corecon.com).

### Product Training

Corecon offers full-service training for all of its products through its VAR channel. This consists of both online and onsite training options which will guide clients on how to use the software and how to improve efficiency in their businesses by using Corecon products. In addition, Corecon periodically offers 3-day classroom training events in Las Vegas, Nevada and Orlando, Florida.

### Executive Overview

#### Norman Wendl

#### President/Founder

Norman Wendl is president and founder of Corecon Technologies, Inc. A construction industry veteran of over 15 years, Wendl manages the growth of the company and provides assistance in the technical direction of its products. Prior to founding Corecon, he worked as an engineer for some of the largest construction firms in Southern California, including McCarthy Building Companies, Inc., Shea-Kiewit-Kenny JV, and Tudor-Saliba-Perini JV. He has extensive experience in software development and construction project management. Norman Wendl is a graduate of Southern Illinois University, Edwardsville with degrees in Civil Engineering and Mathematics.
