CORECON TECHNOLOGIES, INC. INTRODUCES CORECON 2007 SPRING RELEASE

Huntington Beach, Calif., April 12, 2007 – Corecon Technologies, a leading software developer for the architecture, engineering and construction industry, has just released the latest version of its flagship software. The Corecon 2007 Spring Release offers its users a multitude of user-friendly features such as a Microsoft Excel export option for reports and increased dashboard capabilities for financial analysis needs. Now, Corecon 2007 offers the quality and security of any Corecon product in an updated and more accessible format than ever before.

New and enhanced features of Corecon 2007 Spring Release include:

- Microsoft Excel export option for all 450+ reports
- New cross-project financial reports by division and classifications
- New dashboards for alerts and cross-project financials, contracts, quality control, procurement, employee and labor timecards, works-in-progress, leads, and documents
- High-level scheduling across active projects and leads to show work pipeline
- Project schedule capabilities for resetting start and finish dates for successor tasks
- Cross-project task reporting by responsible company and employee
- New import option for labor timecards
- New purchase order/subcontracts wizard

-more-

The new dashboard functions available in Corecon 2007 Spring Release provides a central location for users to view the most urgent information and changes and easily access the tools they need to manage those tasks. All the new dashboards also have improved filtering and grouping capabilities. These handy features create easy access points for synthesizing the information users need to keep their businesses efficient and competitive.

The Corecon 2007 Spring Release offers more tools to quickly and easily organize and access the information effectively. One such capability is importing time-tracking information from third party solutions for effective job costing without duplicate data entry. This version also offers project task recalculation functionality to ease the pain of resetting task start and finish dates. Other features of this new release include new budget tracking and scheduling reports and the ability to run earned revenue and current profit analyses on any job and to export that data to Microsoft Excel. These features will give clients the capability to analyze a multitude of projects and maintain better reporting for field staff and management.

This Corecon 2007 Spring Release is the latest offering from Corecon Technologies, a known leader in the field of construction management software. Corecon was named one of “Constructech’s Hottest Companies” in 2006 by Constructech Magazine after being named one of the magazine’s “Companies to Watch” in past years. Corecon was founded more than a decade ago by experienced construction professionals who understand the architecture, engineering and construction industry and seek to design software that provides cost-effective, user-friendly tools for small to mid-sized firms. Corecon 2007 Spring Release is just such a tool.
