Norman Wendl Selected for 2007 Constructech Residential Advisory Board

Huntington Beach, Calif., June 28, 2007—Norman Wendl, president and founder of Corecon Technologies, Inc., has been selected to the Residential Advisory Board of *Constructech Magazine*.

As president of Corecon, Wendl understands the technology needs of AEC professionals and works to meet those needs with high-quality construction management software tailored to the demands of the industry. Now, Wendl will be sharing his experience with an even broader audience as a member of the Residential Advisory Board of *Constructech Magazine*.

“I am honored to be part of *Constructech*’s Residential Advisory Board,” says Wendl. “*Constructech* has always been and continues to be a leader in our industry as it communicates information about the technology trends and best products on the market to the architecture, engineering, and construction industry.”

As a member of the Advisory Board, Wendl will use his years of experience in the construction industry to aid the editorial staff of the magazine in providing relevant information and quality resources to construction professionals. Wendl’s insight into market trends and his understanding of technology will help the magazine provide useful and engaging information to members of the AEC community.

“We selected Norman based on his knowledge and commitment to helping contractors best leverage technology,” says Mike Carrozzo, editor of *Constructech*.

Prior to founding Corecon, Wendl was an engineer for some of the largest construction firms in Southern California, including McCarthy Building Companies, Inc., Shea-Kiewit-Kenny JV, and Tudor-Saliba-Perini JV. He has extensive experience in software development and construction management, which he has used to benefit Corecon and will now use to help readers of *Constructech*, as well.

Corecon Technologies is a known leader in the field of construction estimating and project management software. Corecon was named one of “Constructech’s Hottest Companies” in 2006 by *Constructech Magazine* after being named one of the magazine’s “Companies to Watch” in past years. Corecon was founded more than a decade ago by experienced construction professionals who understand the architecture, engineering and construction industry and seek to design software that provides cost-effective, user-friendly tools for small to mid-sized firms.
